CAT. 80

A love for detail

Bravo is yet another new video door entry phone from Comelit Group S.p.a., the result of careful studies and continuous technological research at the **Comelit Group S.p.A. Research & Development Centre**.

Every detail has been carefully considered and taken care of. This love of detail is what led us to manufacture this monitor. The elegant and simple line, which can blend into all types of residences and decor. The satin chromed keys, the silver coloured handset cord, brilliant white gloss body colour combined with the etched glass effect facia and an original and innovative desk base are just some of the details considered and studied with care and created. In the digital versions it is possible to personalize the call tone by choosing one of the 7 different melodies.

BRAVO

Handset version

A very slim and elegant line characterises the "Handset" version.

The monitor is able to satisfy all aesthetic requirements and is available in the colour or B/W version with a 4" screen. As standard, it is fitted with a door-opening pushbutton and two pushbuttons for various functions, signalling LED, brightness adjustment, contrast adjustment and slide call volume adjustment .

Without having to open the monitor, it is possible to add a supplementary card with four additional pushbuttons or a card with two additional LEDs and pushbuttons.

Hands-free version

The Hands-free version has an exclusive and innovative design.

The loudspeaker is mobile and can be taken to the ear when you want a conversation to be private. As standard, it is fitted with a door-opening pushbutton, a privacy of call pushbutton and a pushbutton that can be used for various functions, signalling LED, brightness adjustment, contrast adjustment and slide call volume adjustment. This version, too, can be fitted with **supplementary card** (making it possible to add four additional pushbuttons or two LEDs + 2 additional pushbuttons), without having to open the monitor.

BRAVO

A colour for everyone

Comelit Group Spa has thought of everyone and of satisfying every end user's requirements. This is why a **template kit** is available on request, which allows personalisation to the fascia of the monitor, changing its colour and adapting it to a variety of living environments.

COLOURED TEMPLATE KIT

To satisfy all aesthetic requirements, it is possible to buy 10 single coloured templates of the same colour or a complete kit containing the 10 coloured templates available. For the purchase to purchase a template, add a slash followed by the code indicated below to the Bravo monitor code. For example, to purchase a kit with 10 an orange templates suitable for the BRAVO B/W handset version art. 5701, n° 1 art 5701/C/3 must be ordered.

DESCRIPTION	CODE
Kit with 10 coloured templates	C/A

C/4 bright green

C/5 multi-coloured vertical stripes

C/6 grass design

C/7 child's drawing

C/8 shaded light blue

C/9 shaded red

C/10 earth design

Slim Line

The limited depth of **Bravo** monitors is only 51 mm thick which means it can be installed on the wall without having to be flush-mounted.

Still modular

As always, Comelit has aimed at creating a **modular monitor**. A single monitor and several “dedicated” brackets depending on the type of cabling in the system. The “Handset” version has various brackets: Simplebus 1/2, Simplebus with intercom, traditional, simplified and Comelbus. There are only three brackets for the “Hands-free” version (Simplebus 1/2, Comelbus and simplified/ traditional).

art. 5701 BRAVO HANDSET version B/W Monitor

Handset version Bravo monitor with 4” B/W screen, white gloss colour, with the rear silver coloured base. It is fitted as standard with door-opening pushbuttons and two pushbuttons for various functions, signalling LED, brightness adjustment, contrast adjustment and slide call volume adjustment.
